RESEARCH EXPERIENCE

“Feathers, Fins, and Forgotten Joints”: Performer Improvisation Strategies with Nonhuman Avatars in Motion Capture-mediated Dance (Under Review at CHI 2026)

Lead Researcher

- Directed the creation of eight nonhuman avatars and facilitated workshops with 16 professional dancers to investigate improvisation under unfamiliar morphologies, employing both qualitative and quantitative methods for data analysis.
- Generated findings that advance understanding of posthuman embodiment and improvisational practice.

“Lines as Lens”: Supporting Performer’s Understanding of Characters for Rehearsal Process Through LLM-based Narrative Exploration (Under Review at CHI 2026)

Lead Researcher

- Conceived and led the entire project, integrating large language models with theater rehearsal to provide new pathways for character exploration.
- Findings show that LLM-driven narrative agents support deeper character immersion and broaden actors’ interpretive repertoires in rehearsal.

“Becoming My Own Audience”: How Dancers React to Avatars Unlike Themselves in Motion Capture-Supported Live Improvisational Performance (Published in CHI 2025)

Core Research Member

- Co-led study with 15 dancers using five avatar conditions; contributed to proposal drafting, study design, workshop facilitation, data collection, analysis, and manuscript writing.
- Substantial contributions equivalent to first-author responsibilities, resulting in a CHI 2025 publication.
